***Allowable Subject Matter***

1. Claims 1-20 are allowed.
2. The following is an examiner's statement of reasons for allowance: With regard to claims 1-10 and 20, the art of record does not disclose the additional limitation of a touch screen video display mounted within the carrying case and operably connected to the controller to display information from the controller.

With respect to claims 11-19, the prior art of record does not suggest a video display mounted within the carry case and operably connected to the controller to display information from the controller, and wherein the video display is pivotable between a stowed position and a viewing position.

Garcia (US Patent 6,018,614) discloses a portable curing system (see column 1, lines 23-43, which discloses patching airplanes with non-cured material and heating them with the heater) comprising a carrying case (item 12 - see column 3, lines 12-13), a controller (item 14) located within the case, having a microprocessor (i.e., the standard solid state driver circuits - see column 3, lines 31-52), a vacuum pump (see column 4, lines 15-18, which disclose "standard adjustable Venturi openings") located within the case and having at least one vacuum port for connection to a vacuum line, at least one heater connector (item 26, see Figure 2), at least one temperature sensor system which includes a built-in temperature sensor connector for receiving a temperature input, wherein the controller is operably connected to the vacuum pump, the heater connector and the temperature sensor system, and a display format mounted (see Figure 2) within the carrying case and operably connected to the controller to

display information from the controller (via the meters and gages) and to imputer information to the controller. However, Garcia does not disclose the video display. Furthermore, applicant's arguments as to Rohrberg (page 7 of the remarks filed 4/27/2005) being unrelated are persuasive.

Furthermore, applicant's arguments, while slightly incorrect, as to the claim objections are persuasive. Independent claims 11 and dependent claims 12 and 13 lack the element of the display being a touch screen display, which is required in claim 2, 3, and 4. Therefore, the claim objections are lifted.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
